

TESTING SERUM VITAMIN D LEVELS

Policy # 77

Implementation Date: 10/21/19

Review Dates:

Revision Dates:

Disclaimer:

1. Policies are subject to change without notice.
2. Policies outline coverage determinations for Select Health Commercial, Select Health Advantage (Medicare/CMS), and Select Health Community Care (Medicaid/CHIP) plans. Refer to the "Policy" section for more information.

Description

Vitamin D gets its name, "vitamin," because it is a micronutrient that must be obtained through the diet. Vitamin D is synthesized by the skin and metabolized by the kidney into an active hormone called calcitriol. Vitamin D deficiency may be caused by lack of dietary availability, or the body's inability to convert the parent vitamin D into its predominant metabolites. This is often related to a known condition which causes the body to alter the production, or inhibit the conversion of vitamin D. It is for these known conditions which vitamin D testing has been approved.

If a vitamin D test is billed and one of the approved diagnoses is not on the claim, the claim will be denied to the provider because the diagnosis code(s) do not support the billed service. These denials are denied to the provider as a provider liability.

Limitations

Screening for vitamin D deficiency is not covered. These claims will be denied as provider responsibility, and members may not be billed for the test.

In most clinical situations, 25OH vitamin D is the preferred test. A smaller percentage of the deficiencies are related to 1,25(OH)₂ vitamin D deficiency. The test used should be determined by the clinician and should be confirmed by verification of the diagnosis code listed in the approved diagnoses list below.

Once a member has been shown to be vitamin D deficient, further testing is medically necessary to ensure adequate replacement has been accomplished. Monitoring therapeutic replacement would not be expected to exceed two assays per year. Claims processed exceeding the suggested frequency must have accompanying documentation which clearly indicates the necessity of the test.

Once a therapeutic range has been reached, testing would not be expected to exceed one assay per year; repeated testing with both assays is not expected.

Once a beneficiary has been shown to be vitamin D deficient, further testing may be medically necessary only to ensure adequate replacement has been accomplished.

Vitamin D levels between 20 and 50 ng/dl are considered clinically stable, repeat testing is often unnecessary; if performed, documentation must clearly indicate the necessity of the test. Vitamin D levels less than 20 or greater than 60 ng/dl would be an indication for subsequent blood level(s) and may be reimbursed until the level is within the normal range.

COMMERCIAL PLAN POLICY AND CHIP (CHILDREN'S HEALTH INSURANCE PROGRAM)

Select Health covers vitamin D testing when it follows the Centers for Medicare & Medicaid (CMS) guidelines. Additional diagnosis codes have been added to the listings below in order to allow for increased coverage of vitamin D assays.

For specifics and the most current update related to the associated diagnoses and limits of vitamin D testing please review the Local Coverage Determination (LCD): Vitamin D Assay Testing (L34051).

SELECT HEALTH ADVANTAGE (MEDICARE/CMS)

Select Health Advantage **will follow CMS guidelines** plus allowing additional diagnosis codes as specified in the listing below.

SELECT HEALTH COMMUNITY CARE (MEDICAID)

Select Health Community Care **will follow the commercial policy.**

Disclaimer

This document is for informational purposes only and should not be relied on in the diagnosis and care of individual patients. Medical and Coding/Reimbursement policies do not constitute medical advice, plan preauthorization, certification, an explanation of benefits, or a contract. Members should consult with appropriate healthcare providers to obtain needed medical advice, care, and treatment. Benefits and eligibility are determined before medical guidelines and payment guidelines are applied. Benefits are determined by the member's individual benefit plan that is in effect at the time services are rendered.

The codes for treatments and procedures applicable to this policy are included for informational purposes. Inclusion or exclusion of a procedure, diagnosis or device code(s) does not constitute or imply member coverage or provider reimbursement policy. Please refer to the member's contract benefits in effect at the time of service to determine coverage or non-coverage of these services as it applies to an individual member.

Select Health® makes no representations and accepts no liability with respect to the content of any external information cited or relied upon in this policy. Select Health updates its Coverage Policies regularly, and reserves the right to amend these policies without notice to healthcare providers or Select Health members.

Members may contact Customer Service at the phone number listed on their member identification card to discuss their benefits more specifically. Providers with questions about this Coverage Policy may call Select Health Provider Relations at (801) 442-3692.

No part of this publication may be reproduced, stored in a retrieval system or transmitted, in any form or by any means, electronic, mechanical, photocopying, or otherwise, without permission from Select Health.
