Chlamydia Screening	Chlamydia test	All women ages 16-24 identified as sexually active	Once during the measurement year	\$25 per member gap closed
Social Determinants of Health (SDoH) Screening	Utilization of Z Codes for positive screenings identified with prescribed social needs screening tool (Z55-Z65)	All attributing Select Health members	Once during the measurement year	

* For a complete list of prescribed screening tools and qualifying Z codes, please see the [Select Health Quality Provider Program Quality Measures: Women's Health](#) booklet.

Pulling Reports from the Quality Provider Program Clinical Reports Hub

This Report Hub can be accessed from the [QPP area](#) of the Select Health provider website (see image at right).

This section covers two frequently accessed reports available at this location:

- 1 Quality Provider Program Clinical Summary
- 2 Quality Provider Program Gaps in Care for Download

The instructions that follow will guide you through pulling provider rates as well as a patient gaps list once you access the Report Hub.

Access your reports [here](#).
(Note that access is limited to current program participants)

[HOME](#) / [PROVIDERS](#) / [RESOURCES](#) / [QUALITY PROVIDER PROGRAM](#) / [WOMENS HEALTH](#)

Women's Health

The Women's Health Program supports the mental and physical health of women to achieve the best possible outcomes for mom and baby. Measures include screening for prenatal and postpartum depression and substance use for all pregnant women. Our program also promotes chlamydia screening for ages 16 to 24 and social determinants of health screening for all female members. Access these key program resources:

[Women's Health External Dashboard](#) (Access limited to Women's Health Program participants)

Social Determinants of Health 2-1-1 Flyers:

- Colorado 211 Flyer: [English, Spanish](#)
- Idaho 211 Flyer: [English, Spanish](#)
- Nevada 211 Flyer: [English, Spanish](#)
- Utah 211 Flyer: [English, Spanish](#)

- [2023 Performance Measures: Women's Health](#)
- [2023 Women's Health Measures: Quick Guide](#)
- Provider Reference Manual: Women's Health Program - Coming soon!
- Social Determinants of Health Reference - Coming soon!

We work closely with Care Management to promote their Healthy Beginnings specialized care management program. This program is for pregnant members and is included in their Select Health benefits. [Learn More](#).

NOTE: See [page 9](#) for Excel formatting tips customized for working with Gaps in Care data.

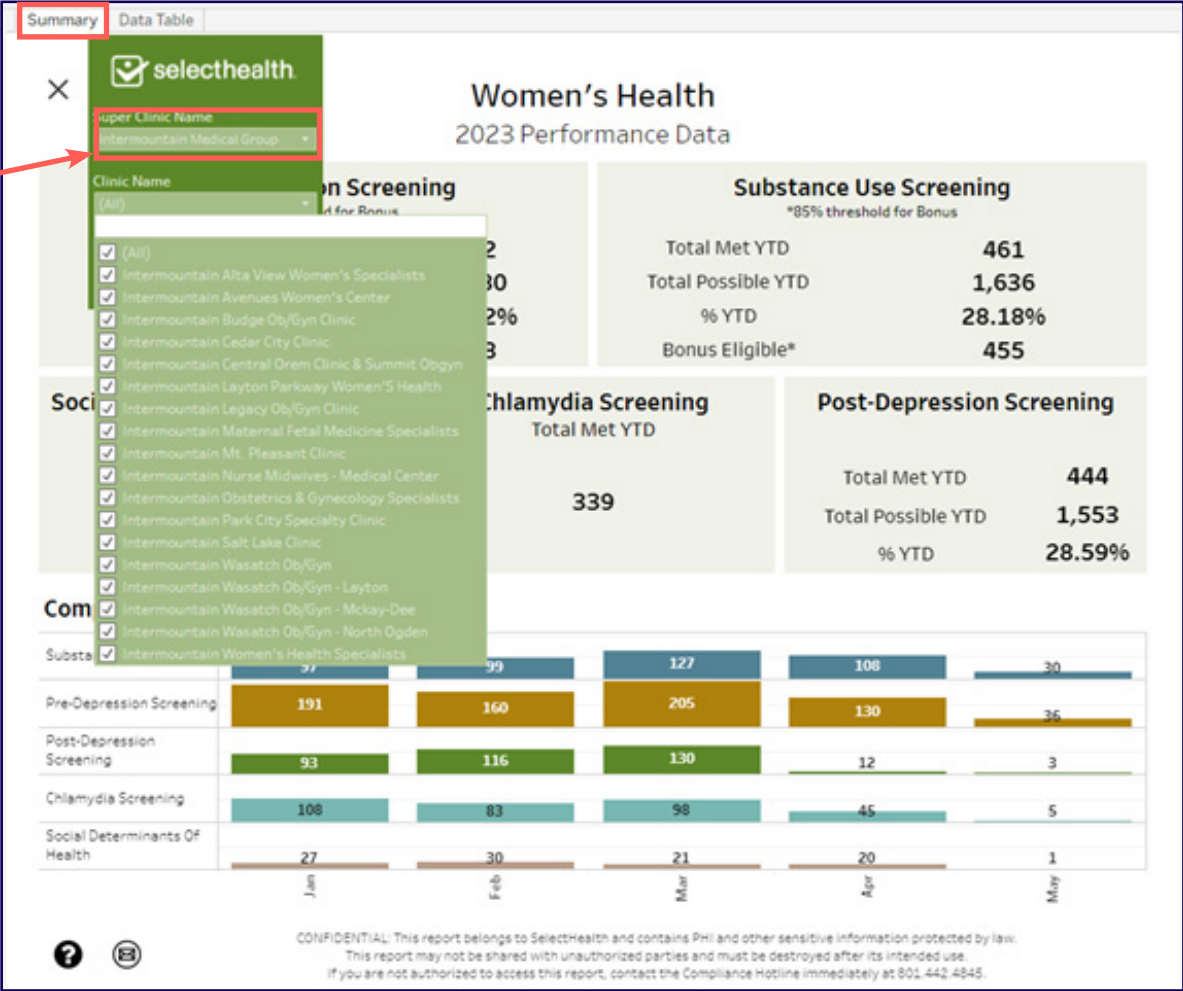

How to Pull Provider Rates from the Clinical Summary Report

Performance rates data allows you to track current clinic rates and number of member opportunities within your clinic. From the Quality Provider Program Report Hub link, follow the steps below:

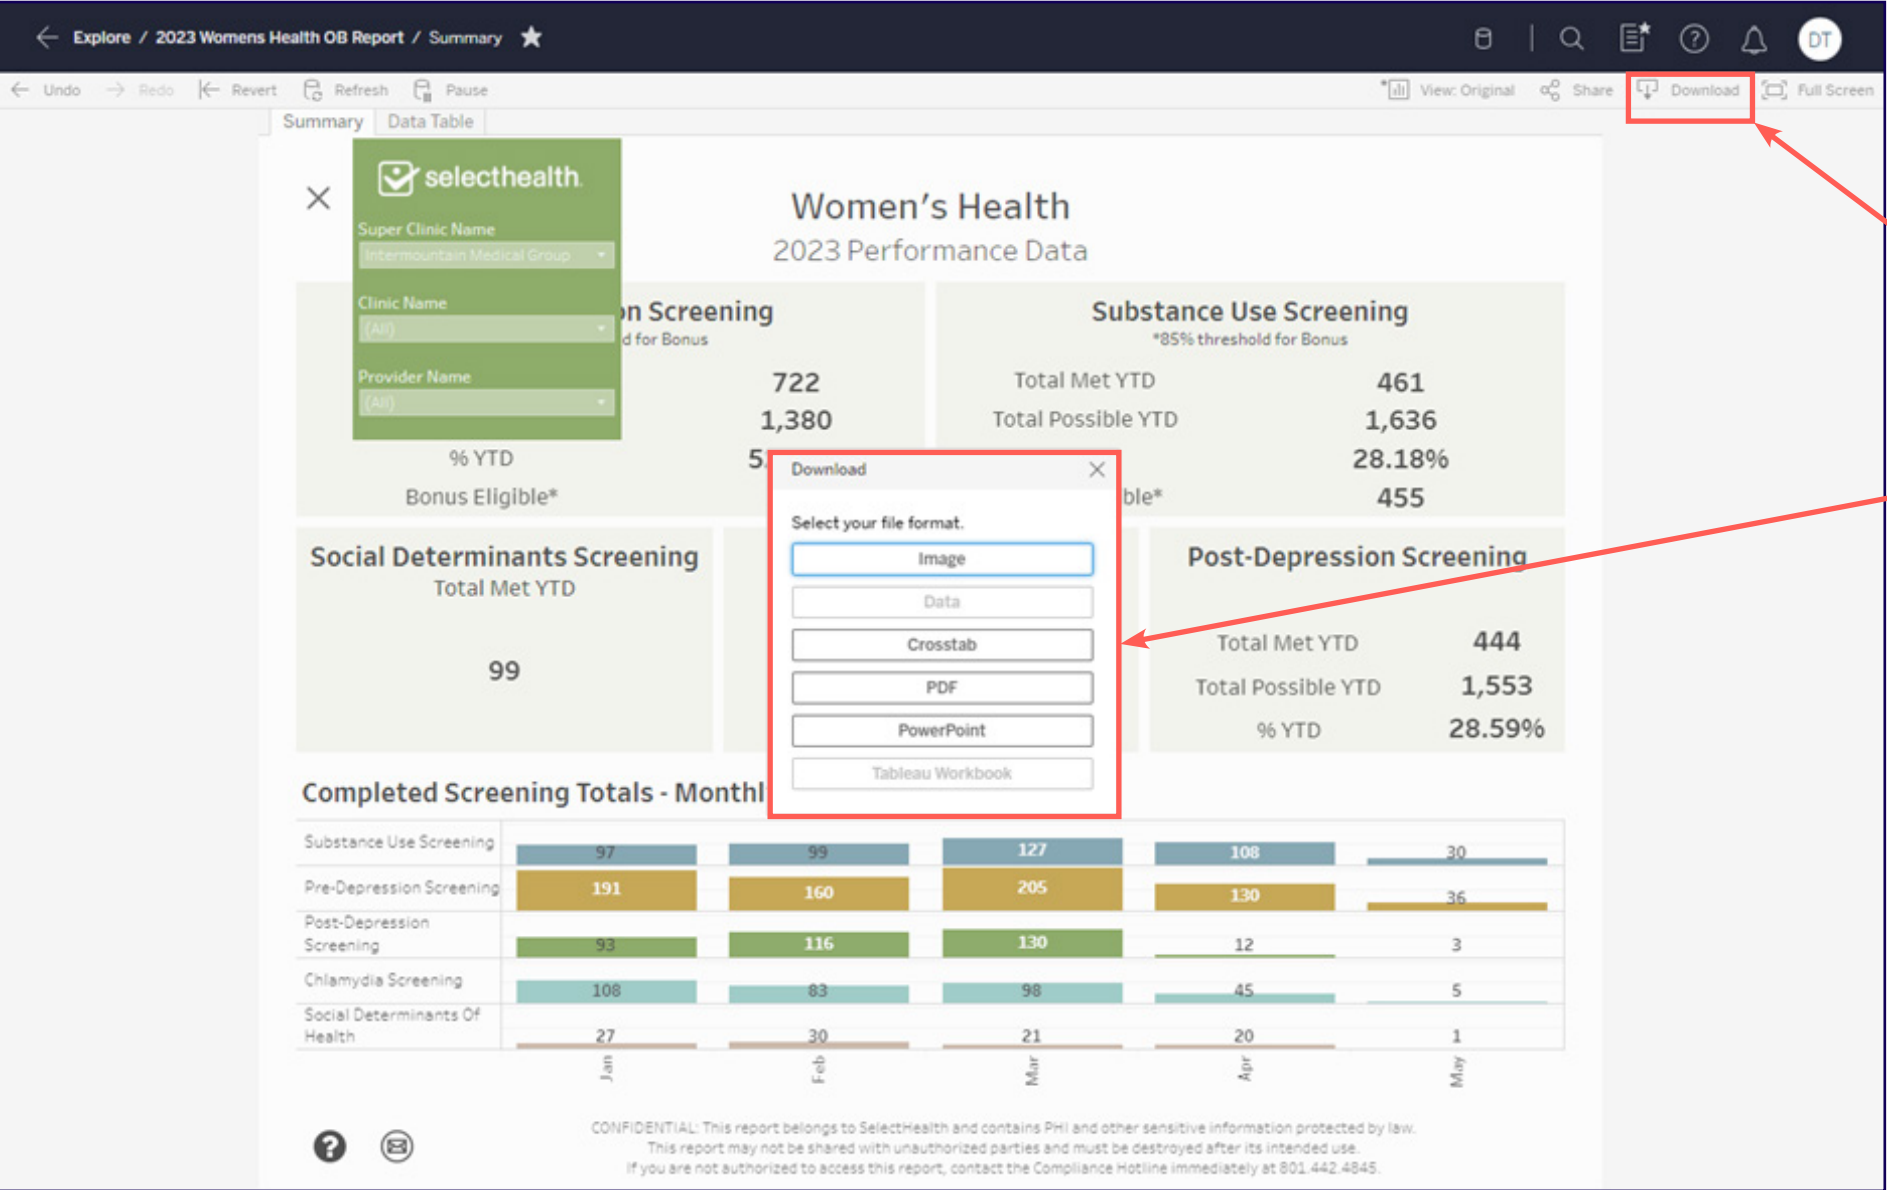

Access Clinic-Specific Data

The “Summary” tab offers filters for refining your data search.

Use the filter to select the Super Clinic, Clinic Location, and Provider information desired.

Pulling Provider Rates, Continued

Download and select your preferred file format.

How to Download a Gaps in Care List

Patient gaps data allows you to track current member gaps for different populations, measures, specialties, and more.

Access the Gaps in Care Report and Export the Data

Click on the download button in top right corner.
Then, select "Crosstab" from the items here.

To download a list for corrections, click on the "Data Table" tab.

Additional filters may be added related to measure information and member search.

To make sure you capture all relevant data, select "CSV" and then "Download."

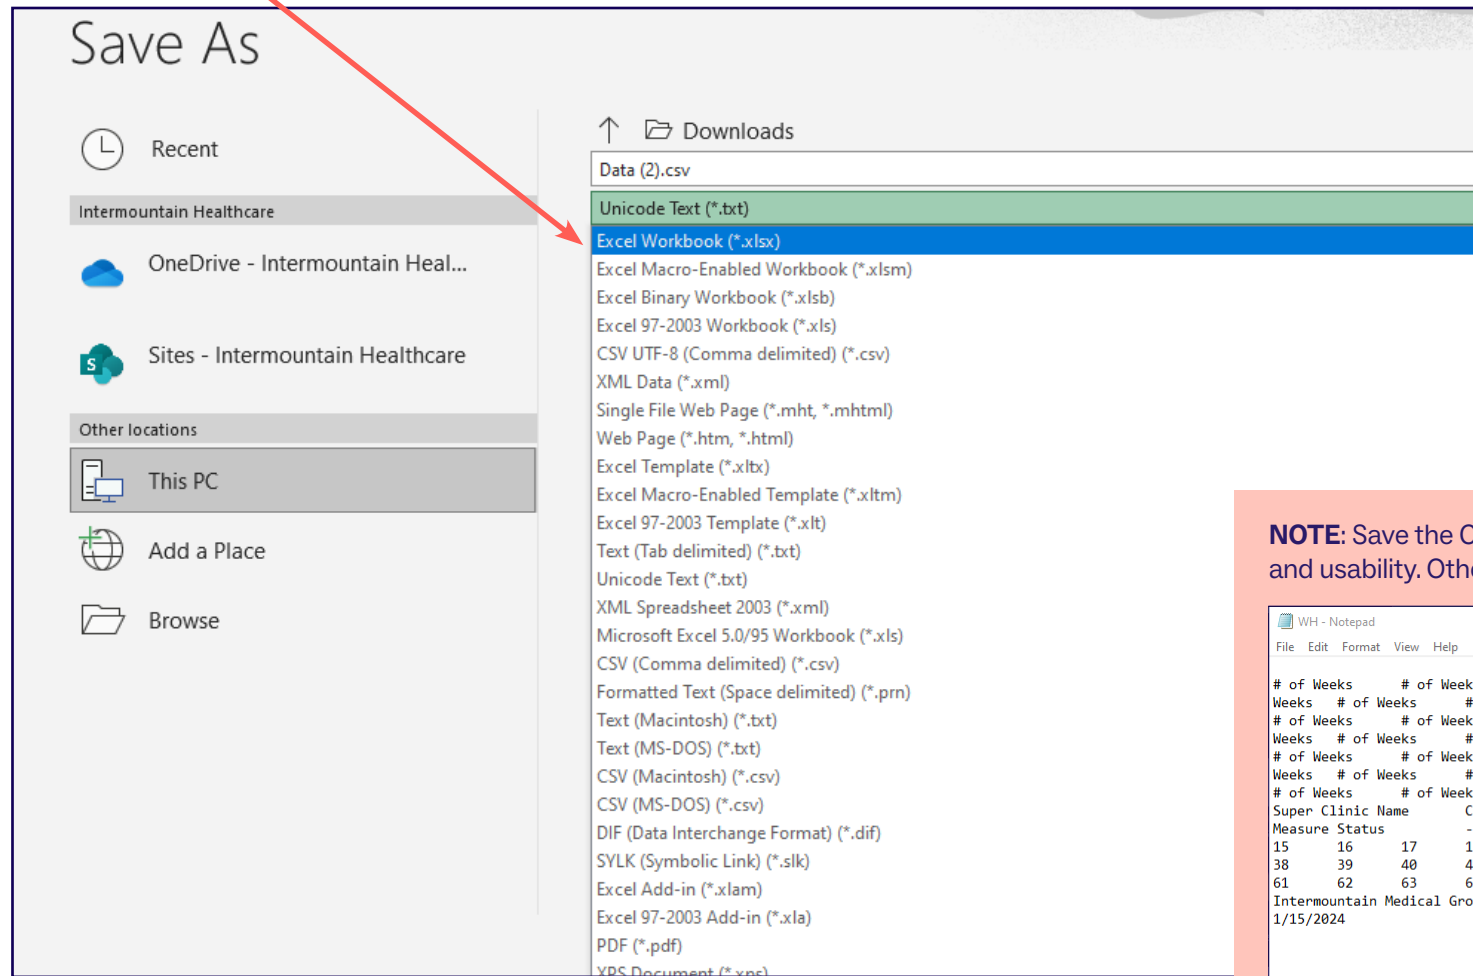

The screenshot shows the Select Health dashboard for Women's Health 2023 Performance Data. The 'Data Table' tab is selected. A 'Download' button is in the top right corner. A 'Download' dialog box is open, showing 'Crosstab' as the selected file format. A 'Download Crosstab' dialog box is also open, showing 'Data' as the selected sheet and 'CSV' as the selected format. A 'Download' button is at the bottom of this dialog.

Pulling a Patient Gaps List, Continued

Save as Excel File

Save the CSV file as an Excel workbook to allow formatting for readability and usability.

NOTE: Save the CSV file as an Excel workbook to allow formatting for readability and usability. Otherwise, your CSV file will look like this:

[illegible]

QDC Tool Instructions: Submitting a Correction

The QDC Data Correction Tool can be accessed via the [Quality Provider Program Report Hub](#). Use this tool to enter submissions and view approvals/submissions.

NOTE: Currently, Chlamydia Screening is the only measure allowing corrections to be submitted using the Quality Data Correction (QDC) Tool.

From the QPP Reports Hub, select the Quality Data Corrections Tool.

Upload supporting documentation and add any necessary comments.

NOTE: The only formats supported are .xls, .xlsx, .pdf, and .png file formats.

You can add multiple attachments; however, they must have different file names. If you upload a document with the same name, you will see an error message and will be able to replace the existing file or cancel the upload.

Select the “trash” button to delete an incorrectly uploaded document. You will then have the option to delete or cancel.

TIPS FOR SUBMITTING CORRECTIONS:

- For rejected corrections, providers may have the option to resubmit the correction. A majority of the selections will be kept except for the attachments, result date, and result value.
- When resubmitting, consider reopening and downloading the patient file so that you won't have to dig through files looking for the patient record.
- Corrections that have been resubmitted and accepted will still appear as a rejection. Do not resubmit the correction twice if the newly submitted correction was approved.

Allowable Corrections Guide

General Guidance

- Include a copy of EMR note, progress note, or screen print signed by MA/RN/MD including member name, DOB, and provider.
- Submit corrections using [this online tool](#).
- Wait 6 weeks from the date of service to enter corrections to allow for claim lag.
- Don’t attach multiple patient records to a single correction

Chlamydia Screening						
Allowable Correction	Submission Correction Process				Additional Required Documentation (see “General Guidance” for Standard Requirements)	Notes for Entering Corrections
	Category	Measure	Component	Correction Type		
Unaccounted for Chlamydia Screening	Preventive Screening	Chlamydia Screening	CHL Numerator	Chlamydia Culture	Date & result of chlamydia screening	The National Committee for Quality Assurance (NCQA) does not allow exclusions for abstinence or monogamy

For all other Women’s Health measures, manual corrections are allowed. Please contact your Quality Provider Performance Representatives for more information (QualityProvider@selecthealth.org).

Appendix: Other Resources

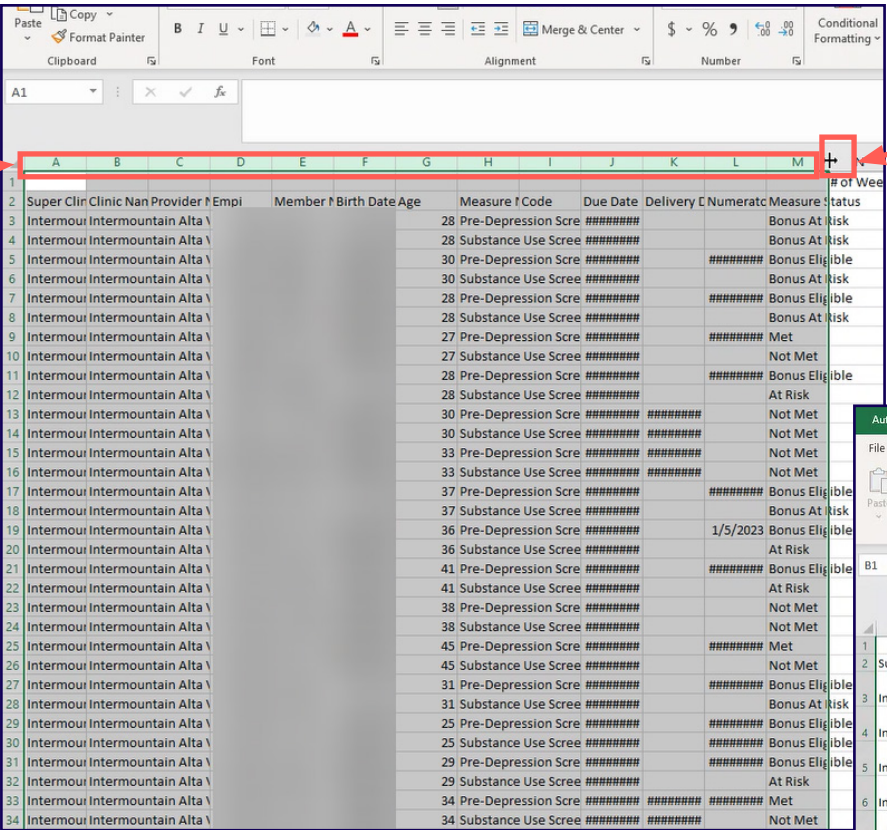

How to Format a Gaps in Care for Download -- Performance Data Table in Excel

Once you have downloaded and saved the Gaps List in Excel, open the file and follow the formatting tips in this section. These tips will help you manage the data in the Gaps List more efficiently. For more information on these functions and other common Excel formatting tips, access Microsoft's [Excel Training Page](#).

The examples on this page indicate how to widen rows A through M in the Excel spreadsheet, making it easier to read the data.

Widen a Column and Wrap Text

Select columns with information by holding down your mouse, starting at the top of column A and dragging to the last column with data.

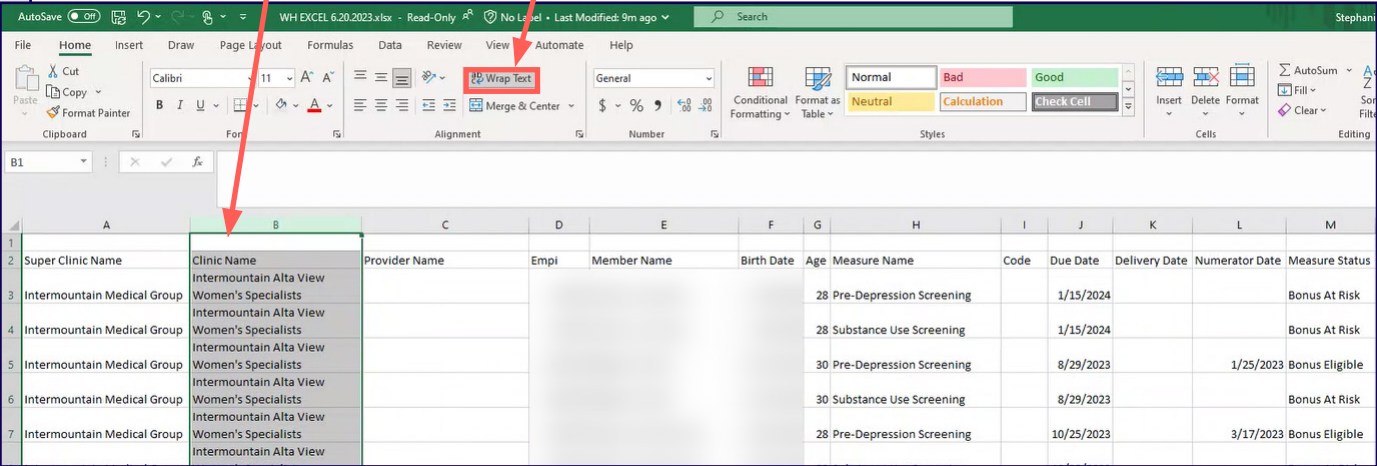

The screenshot shows an Excel spreadsheet with columns A through M highlighted in green. A red box and arrow point to the selection. The data includes columns for Super Clinic Name, Provider Name, Member Name, Birth Date, Age, Measure Name, Code, Due Date, Delivery Date, Numerator Date, Measure Status, and # of Weeks.

Super Clinic Name	Provider Name	Member Name	Birth Date	Age	Measure Name	Code	Due Date	Delivery Date	Numerator Date	Measure Status	# of Weeks

Intermountain Medical Group	Intermountain Alta View	Women's Specialists			25 Substance Use Screening	#####				Bonus Eligible	
Intermountain Medical Group	Intermountain Alta View	Women's Specialists			29 Pre-Depression Screening	#####				Bonus Eligible	
Intermountain Medical Group	Intermountain Alta View	Women's Specialists			29 Substance Use Screening	#####				At Risk	
Intermountain Medical Group	Intermountain Alta View	Women's Specialists			34 Pre-Depression Screening	#####				Met	
Intermountain Medical Group	Intermountain Alta View	Women's Specialists			34 Substance Use Screening	#####				Not Met	

Next, hover between any column divider that is highlighted until the column resize pointer appears. Double click on the pointer to resize the selected columns.

This is the resulting view once the columns have resized.

For readability of the resized columns, make sure all columns are still selected. Then, click on "Wrap Text" to fit the content in the columns to the new width.

The screenshot shows the Excel ribbon with the 'Wrap Text' button highlighted. Below the ribbon, the spreadsheet shows the same data as the previous table, but with columns A through M resized to fit the content.

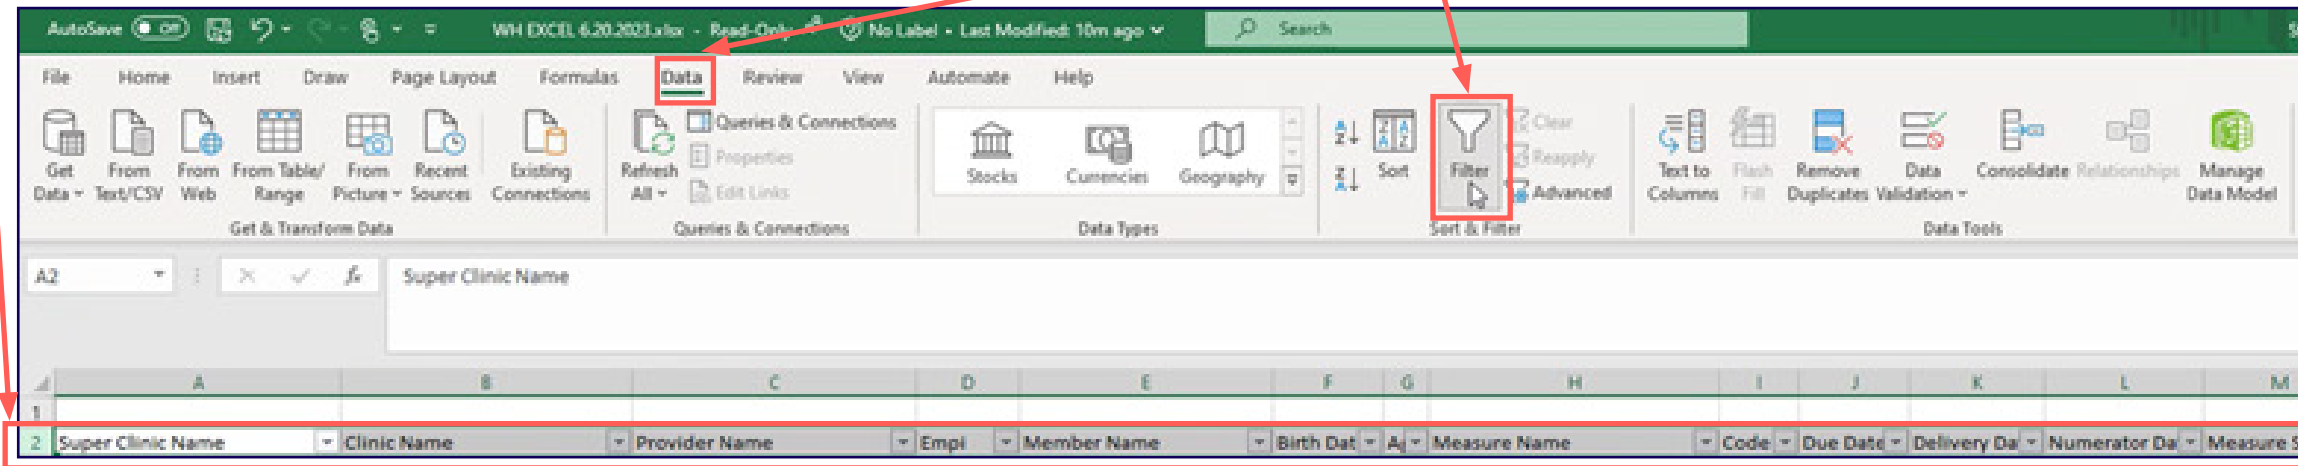

Super Clinic Name	Provider Name	Member Name	Birth Date	Age	Measure Name	Code	Due Date	Delivery Date	Numerator Date	Measure Status

Formatting a Gaps List in Excel, Continued

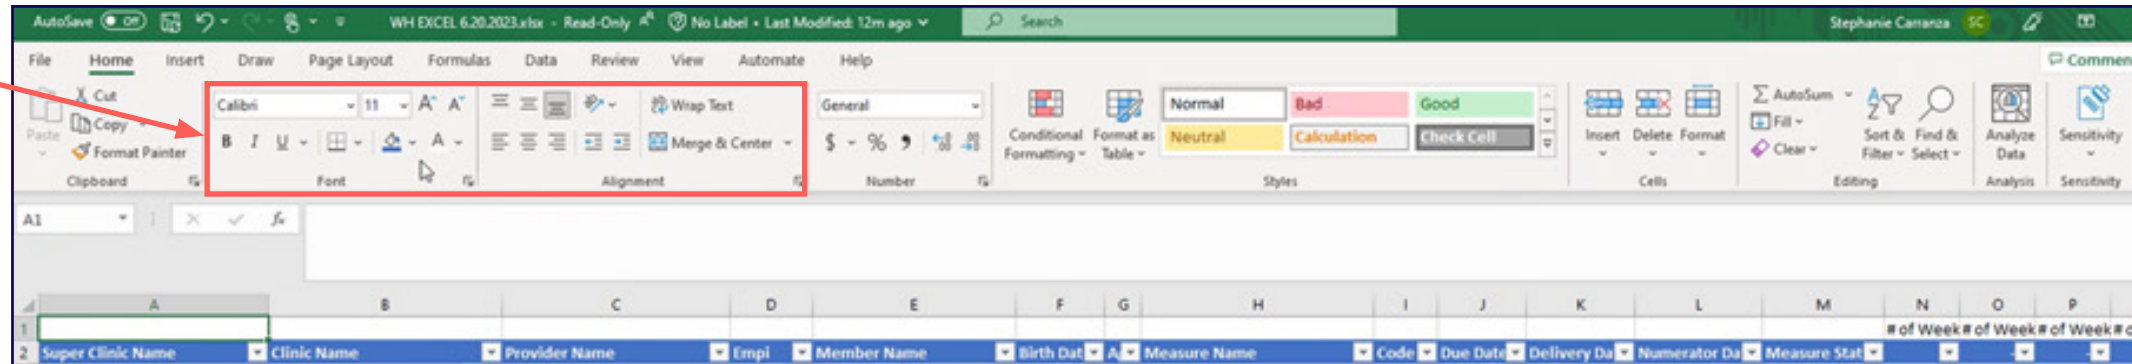

Filter Data and Apply Custom Formatting

Select row 2 (or any combination of rows that you want to filter).

Then, select “Data” and “Filter.” This will create drop-down filters to organize the data in row 2.

Use the “Font” and “Alignment” sections of the tool bar to custom format cells (e.g., to distinguish table headings).

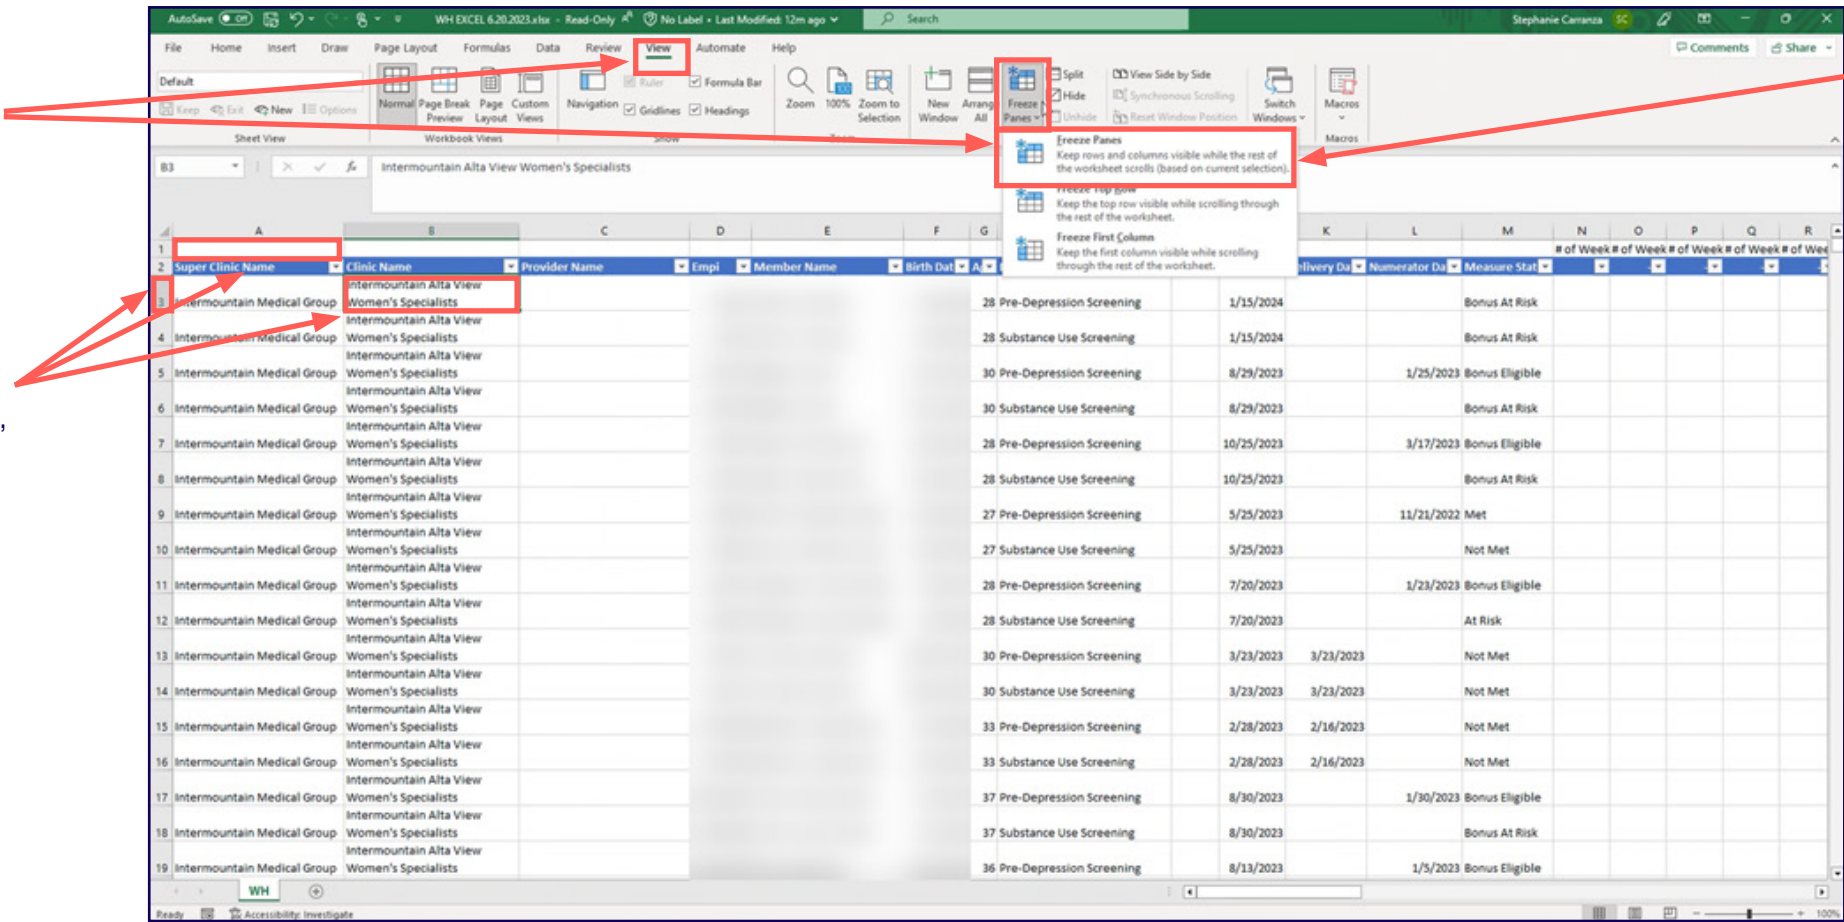

Formatting a Gaps List in Excel, Continued

Freeze Panes to Make Scrolling and Comparing Data Easier

To scroll through the data and still have the headers visible, you can freeze rows by selecting “View” and “Freeze Panes.”

If you want to freeze a row (e.g., row 2) and a column (e.g., column A), select the cell BELOW the row and to the RIGHT of the column you want to freeze.

Then, select “Freeze Panes.” Doing so freezes everything above and to the left of the cell selected to “Freeze.”
