Growing healthy, step by step

Here's a helpful way to track immunizations at well-child visits.

Select Health

Your child's name _____ **Birthday** ___ /___ /___

Newborn

Date of visit ___ /___ /___

- ☐ Hepatitis B

Did you know?
Some vaccines are combined, so 2 or 3 shots at a visit can protect against several diseases. Talk with your child's doctor to learn more.

2 months

Date of visit ___ /___ /___

- ☐ Hepatitis B
- ☐ DTaP (Diphtheria, tetanus, acellular pertussis)
- ☐ Hib (Haemophilus influenza type b)
- ☐ Pneumococcal
- ☐ Polio
- ☐ Rotavirus

4 months

Date of visit ___ /___ /___

- ☐ DTaP (Diphtheria, tetanus, acellular pertussis)
- ☐ Hib (Haemophilus influenza type b)
- ☐ Pneumococcal
- ☐ Polio
- ☐ Rotavirus

6 months

Date of visit ___ /___ /___

- ☐ DTaP (Diphtheria, tetanus, acellular pertussis)
- ☐ Hib (Haemophilus influenza type b)
- ☐ Hepatitis B
- ☐ Pneumococcal
- ☐ Polio
- ☐ Rotavirus

These immunizations can happen anytime after 6 months.

- ☐ Influenza
- ☐ COVID-19

12-15 months

Date of visit ___ /___ /___

- ☐ DTaP (Diphtheria, tetanus, acellular pertussis)
- ☐ Hib (Haemophilus influenza type b)
- ☐ Hepatitis A
- ☐ Pneumococcal
- ☐ Varicella* (Chicken pox)
- ☐ MMR (Measles, mumps, rubella)

18 months

Date of visit ___ /___ /___

- ☐ Hepatitis A

* Your child won't need the varicella vaccine if they've already had the chicken pox.
